## System Administrator / Software Engineer

Highly skilled and certified System Administrator and Software Engineer with over 3 years of experience in managing and maintaining IT systems and networks. Expertise in configuring and troubleshooting hardware, software, and network issues. Adept at ensuring system security, optimizing performance, and providing excellent technical support. Proven ability to work in fast-paced environments and lead IT projects to successful completion.

## Technical Skills

- **Operating Systems**: Windows Server, Linux (Ubuntu, CentOS, Red Hat)
- **Networking**: TCP/IP, DNS, DHCP, VPN, Firewalls
- **Cloud Services**: AWS, Azure, Google Cloud Platform
- **Virtualization**: VMware, Hyper-V
- **Scripting**: PowerShell, Bash, Python
- **Security**: Active Directory, LDAP, SSL, IDS/IPS, Security Patching
- **Tools**: Ansible, Nagios, Docker, Jenkins, Git
- **Languages:** PHP, JavaScript, Node.js, Python, Laravel
- **Web Technologies:** HTML, CSS, JavaScript, AJAX, JSON, RESTful APIs, GraphQL
- **Frameworks & Libraries:** Express.js, Laravel, React, Vue.js
- **Database Management:** MySQL, PostgreSQL, MongoDB, Redis.

## Experience

2022 - 2023
**System Administrator | NowNow Digital Systems | Lagos Nigeria**

- Administered Active Directory, DHCP, DNS, and Group Policy in a multi-domain environment.
- Installed, configured, and maintained servers, storage systems, and network devices.
- Implemented security policies and procedures, enhancing system protection against threats.
- Provided Tier 2 and 3 technical support, resolving complex hardware and software issues.

- Conducted regular system audits and applied security patches, reducing vulnerabilities.

AUGUST 2020 - 2022
**System Administrator / Web Developer | Swift Edge Academy | Lagos Nigeria**

- Designed and implemented RESTful APIs using Node.js and PHP, improving system performance and scalability.

- Managed and configured Linux servers, ensuring high availability and security of web applications.

- Developed automated deployment pipelines using Jenkins and Ansible, reducing deployment times by 30%.

- Monitored system performance and performed routine maintenance using Nagios and ELK Stack.

- Collaborated with cross-functional teams to define, design, and ship new features.
- Implemented containerization using Docker and Kubernetes, streamlining the development process and enhancing application portability.

# Education

JANUARY 2023
**HND Computer Science | Lagos State Polytechnic | Lagos Nigeria**

FEBRUARY 2018
**OND Computer Science | Yaba College of Technology | Lagos Nigeria**

# Projects

- **AWS Migration Project**: Successfully led the migration of 50+ servers to AWS, improving scalability and reducing operational costs.
- **Automation Initiative**: Developed scripts for automated backups, patch management, and system monitoring, resulting in a 30% increase in operational efficiency.
- **Network Security Enhancement**: Implemented advanced firewall configurations and intrusion detection systems, significantly reducing security incidents.
